

If you are looking for the benchmark in water care technology, here it is.

The Zodiac TRi Series was created to give peace of mind for swimming pool owners because it provides a combination of automation and intelligence usually only found in commercial grade pool equipment.

With the Zodiac TRi-Series you can select the level of water care you need. Buy the model you want from the start or upgrade at anytime with different options of automation and water care sensing technology that will keep your pool healthy and ready for you to swim at any time.

Chlorination

The base model TRi will provide most with what they are after, a great reliable chlorinator. But what makes the TRi base model so much more than other chlorinators is the ability to upgrade this at anytime to a higher level of water care with minimum expense and effort.

The control panel is quick and easy to set up and has a full onboard troubleshooting guide and help prompts if there is an issue. Also using the very best in self cleaning plate materials, the cell has reverse polarity technology keeping maintenance to a minimum.

pH Control

This is the new gold standard in pool sanitation devices and is the absolute must have for anyone that wants to have the pool water at ideal quality whenever you want to swim. pH control is the most important component in anyone's pool water chemistry kit, without pH control the pool will always be out of balance. TRi-pH builds on the standard model by incorporating an intelligent pH sensor that will deliver information to the master control unit and deliver a pH down solution as required by your pool.

PRO Control*

For the pool enthusiasts that are looking for the best of the best. TRi-PRO builds again on TRi-pH by incorporating an ACL sensor (Active Chlorine Level, commonly called ORP). The ACL sensor will measure and report back to the control unit whether the amount of sanitiser in the water is satisfactory and then engage the chlorinator cell to turn on or off as required when the pump is in operation, meaning no more guess work on the chlorine levels in the pool.

*TRi-PRO is only available through accredited installers

The TRi comes in 3 sizes, use this graph to see which size you will need to suit your pool in your climate.

What size TRi chlorinator do you need?

Average climate conditions

Description	TRi Compact	TRi Mid	TRi Large
Output capacity (CI gas)	18grm/hr	25grm/hr	35grm/hr
Maximum* average pool size	40,000 litres	70,000 litres	100,000 litres
Plumbing capacity	40mm or 50mm (unions provided)		
Min/Max salt level	4,000ppm - 35,000ppm		
Power Pack dimensions (HWD)	330mm x 310mm x 110mm		
Cell dimensions (LHW)	320mm x 155mm x 110mm		
Warranty on power pack and cell	Tri - 3yrs/Tri-pH 4yrs/TRi-PRO 5yrs		

^{*}Based on a mild weather climate. Adjust for cooler or warmer climates.

Zodiac lives in the backyards of Australian families, at home in the pool. Zodiac began and continues with a dedication to innovation and new product development, focused on ensuring a better way of life. Our products deliver solutions to take the hassle out of owning a pool. So, all that's left is for you to enjoy it; to enjoy a better life.
