

Environmental Policy

Purpose

Momentum Pools has a steadfast commitment to protecting and improving the environment. The purpose of this policy is to provide guidance in determining the responsibilities of all, Directors, Managers and staff in ensuring the company meets its environmental obligations.

Scope

This policy applies to all Directors, Managers and Staff of Momentum Pools and details the appropriate measures required to fulfill the company's environmental obligations.

Policy

This environmental policy applies to all of Momentum Pool's operations within Australia. The Directors of Momentum Pools Pty Ltd consider environmental management an integral and fundamental part of the Company's corporate business strategy.

We will take all necessary steps to comply with state and federal legislation and other standards affecting our activities, together with any future standards of protection.

Using the principle of continual improvement, the Company is committed to the prevention of pollution and aims to achieve the highest possible environmental standards.

To this end, it is the aim to operate within the constraints of an accredited environmental management system. This system will establish a framework for identifying all environmental aspects of our materials, processes and products and assessing their impact.

All rubbish is to be removed from every job site and take special consideration to ensure;

- All concrete rubble and masonry waste is to be sorted on site and left in separate pile to general rubbish - so it can be recycled
- All cardboard / paper waste is to be stored separately and recycled through cardboard waste bin.

We will ensure that, in order to demonstrate continual improvement, mechanisms are established to set and review environmental objectives and targets. These objectives will include:

- The efficient use of all materials, supplies, energy and transport. Wherever possible the principles of sustainable development will be adopted.
- Preventing, reducing or controlling, where practicable, emissions to all environmental media.
- The minimisation of waste from all parts of the company's operations. Wherever possible waste materials will be reprocessed or recycled. In addition, we will require high environmental standards from suppliers, vendors and contractors involved with the company.

We will seek to develop and maintain, where significant hazards exist, emergency plans in conjunction with the emergency services, relevant authorities and the local community. We will ensure that all necessary resources are provided in the areas of operational control; engineering, technology and training as are necessary to enable those with specific duties to effectively discharge their responsibilities.

We will ensure awareness and participation of all our employees through communication, training and participation in continuous improvement teams.

We will seek to develop the active co-operation and input of all stakeholders within the environmental management system in respect of concerns about the hazards and impacts of our operations. We will ensure that this policy is publicly available to suppliers, customers, stakeholders and the general public through distribution of copies, public registers and the use of information technology.

This policy, its underlying procedures and the effectiveness of its implementation will be monitored and reviewed by the Company Directors. This policy document and the objectives and targets will be updated, as necessary following annual management reviews.
